Portfolio Project Brief

Advancing Your Data Governance Strategy
Advanced Software Engineering - Module 1

How to use this brief:

Read this document in full and bring any questions you have on the assessment to either a workshop or the next 1:1 with your instructor. **Advance in your project journey by completing milestones**, which are progress checks on tasks that build to your overall output. Milestone submission and reviews will be part of your workshop and independent work. **Self-assess your progress** against the assessment criteria table while completing your project.

Module Title	Advancing Your Data Governance Strategy		
Format	Recorded Video Presentation	**Deadline**	On MyMultiverse
Length	20 minute presentation (21 minutes max)	**Feedback Due**	Within 20 working days of submission date
Intended Audience	Senior Leaders in your organization (but delivered to your instructor)	**Weighting**	100%
Project Title	Data Strategy Proposal and Technical Implementation Plan		
Project Learning Outcomes	1. Demonstrate a critical understanding of the relationship between data, technology and organizational strategy. (K7, S8) 2. Use the principles of leadership to critique a data strategy and proposed enhancements which improves decision making and/or creates business value. (K9, K10) 3. Analyze organizational approaches to data/digital governance, including the development or acquisition of data solutions. (K7) 4. Use sustainable development approaches, such diversity and inclusion, to critically analyze and improve data strategy. (K20, B8)		
Project Milestones	**Milestone 1: Evaluate your organization's data strategy and governance.** Use principles of leadership to thoroughly evaluate your organization's relationship between data strategy, data governance, and value. (week 3) **Milestone 2: Create one recommendation for change, considering sustainable development.** Considering your evaluation, where could you recommend a change that would better exploit data and technology to		

	deliver value? Further, could your recommendation help to future-proof your organization by exploring emerging technologies? Consider organizational strategy to ensure that your recommendation is developed sustainably in order to promote improvements in diversity and inclusion. (week 6) **Milestone 3: Create an implementation plan for your proposal.** For your proposed change, deliver a compelling proposal that focuses on the business impact of your data strategy recommendation. Include a detailed implementation plan, considering potential limitations and risks to inform the impact and scalability of your proposal. (week 9)

Why is this project important to me and my organization?

This project provides an opportunity to make a tangible impact on your organization's strategic use of data and technology and simultaneously develop the core skills for becoming a data leader. By evaluating and proposing enhancements to the data strategy and governance, you have the chance to directly influence top-level decisions on data strategy.

For your organization, the primary benefit lies in leveraging these insights to sharpen competitive edge, enhance operational efficiency, and promote a culture of inclusivity and sustainability. Your role in this project not only showcases your analytical skills and strategic thinking but also positions you as a pivotal contributor to your organization’s overall strategy development.

What do I need to do for this project?

For this project, as a software engineering apprentice, your goal is to demonstrate a deep understanding of how data and technology can be strategically leveraged to drive value and organizational success. You will be required to apply leadership principles, critically analyze data strategy and governance approaches, and incorporate sustainable development practices to recommend an area for change that will enhance (or develop) your organization's relationship with data.

Throughout the project, you will be required to analyze organizational approaches to data/digital governance, including the development or acquisition of data solutions, and use sustainable development approaches, such as diversity and inclusion, to critically analyze and improve data strategy. You will also need to consider future iterations of this strategy to utilize emerging technologies, maximizing the business impact of your strategy.

Final Project Output

You will prepare a 20-minute video presentation of a proposal to enhance an element of your organization's data strategy and governance. This is an opportunity for you to pitch an idea, applying foundational knowledge and critical thinking in this area.

Video Presentation Recommendation:

- Maximum duration: 21 minutes (assessors will stop watching after 21 minutes)
- Record using Zoom, Teams, or Google Meet - Follow this walkthrough if you’re unsure how to do this!

-
- Test the video link with a colleague or private email to ensure external access
- Submit both the video link AND your slide deck (required for EPA and plagiarism checks)

**Note: This is just a guideline for the structure of what you produce.*

Section	Content Covered
1. Introduction (2 min) LO1: K7, S8	In this opening section, introduce yourself and establish the context for your data strategy enhancement proposal. Present a clear problem statement and outline the scope of your presentation. Key content to include: • Brief introduction of yourself, your role, and your organization's current data landscape (K7, S8) • Clear articulation of the specific data strategy challenge or opportunity identified (K7, S8) • High-level scope of your proposal and anticipated business impact (K7, S8) • Preview of your key recommendation and approach Slide recommendations: • Slide 1: Title slide with your name, role, and presentation title • Slide 2: Organization context with visual representation of current data landscape • Slide 3: Problem statement with quantifiable organizational impact
2. Data Strategy and Governance Evaluation (4 min) LO3: K7	In this section, provide a thorough assessment of the organization's current data strategy and governance framework, identifying key gaps and improvement opportunities. Key content to include: • Overview of the organization's current data strategy and governance structure (K7) • Evaluation of existing data governance approaches, models, and tools (K7) • Assessment of current data quality management practices (K7) • Gap analysis highlighting areas for strategic improvement (K7) • Identification of key opportunities for enhancement (K7) Slide recommendations: • Slide 4: Current data governance framework visualization (matrix or hierarchy diagram) • Slide 5: Evaluation of existing data management tools and approaches

© Multiverse

	• Slide 6: Data quality assessment dashboard with key metrics • Slide 7: Gap analysis heat map showing priority improvement areas • Slide 8: Summary of key improvement opportunities
3. Your recommendation for change (4 min) LO1: K7, S8 LO2: K9, K10	Present your specific recommendation for enhancing the organization's data strategy, with clear justification and alignment to business objectives. Key content to include: • Detailed description of your single proposed change to data strategy (K9, K10) • Strategic alignment with organizational goals and objectives (K9, K10) • Consideration of future data technologies and trends (K9, K10) • Justification for the recommended change considering organizational strategy (K7, S8) • Expected benefits and business value of implementing your recommendation (K9, K10) Slide recommendations: • Slide 9: Proposed solution overview with visual representation • Slide 10: Strategic alignment map showing connection to business objectives • Slide 11: Future technology considerations and integration approach • Slide 12: Expected benefits visualization and business value proposition
4. Sustainable Development Analysis (4 min) LO4: K20, B8	Analyze how sustainable development principles can be integrated into your data strategy recommendation to drive better decision-making and business value. Key content to include: • Integration of sustainable development principles into your data strategy recommendation (K20, B8) • Analysis of how your proposal supports diversity, inclusion, and ethical data practices (K20, B8) • Environmental considerations in data management (K20, B8) • Connection between sustainable data practices and business value (K20, B8) • Your role as a data leader in promoting sustainable development (K20, B8) Slide recommendations: • Slide 13: Sustainable development framework for data strategy • Slide 14: Diversity and inclusion impact assessment

© Multiverse

	• Slide 15: Environmental and ethical considerations in data management • Slide 16: Business value creation through sustainable data practices
5. Implementation and Impact Analysis (4 min) LO2: K9, K10	Outline your implementation plan with consideration for risks, limitations, and strategies for ensuring successful adoption and long-term impact. Key content to include: • Detailed implementation roadmap with key milestones and timeline (K9, K10) • Resource requirements and stakeholder engagement strategy (K9, K10) • Risk assessment and mitigation planning (K9, K10) • Strategies for addressing limitations to ensure scalability and impact (K9, K10) • Approach for adapting to the evolving landscape of data and technology (K9, K10) Slide recommendations: • Slide 17: Implementation roadmap with timeline and key milestones • Slide 18: Stakeholder map and engagement strategy • Slide 19: Risk assessment matrix (likelihood vs. impact) • Slide 20: Mitigation strategies for top implementation risks • Slide 21: Future scalability and technology adaptation approach
6. Conclusion (2 min)	Summarize your key recommendations and provide a clear call to action for moving forward with your data strategy enhancement. Key content to include: • Summary of the project's goals, methodology, and anticipated impact • Recap of key benefits and business value • Reflection on the leadership principles applied in developing this proposal • Clear next steps and call to action Slide recommendations: • Slide 22: Summary of key recommendations and anticipated impact • Slide 23: Leadership principles applied and next steps

© Multiverse

Examples of Projects

- **Fintech Project:**
    - Analyzing customer spending patterns and financial data to develop a personalized financial product recommendation engine, and creating a data governance plan to ensure data privacy and regulatory compliance.
- **Food Service Project:**
    - Developing a data strategy to optimize supply chain management and reduce food waste in a restaurant chain, by analyzing data on inventory levels, delivery schedules, and customer demand.
- **Healthcare Project:**
    - Creating a data strategy to improve patient outcomes and reduce healthcare costs by analyzing patient medical records and treatment data to identify patterns and trends that can inform clinical decision-making and resource allocation.

Project Milestones

Project milestones are completion points for the overall output of your module project. Please note that the project is intended to be a piece of applied work that develops over the course of the module, rather than a summative assessment to be completed in a short, intense period of time at the end of module learning.

NOTE: For step-by-step guidance on milestone completion, follow the Milestone activities for the module on your MyMultiverse account.

Check Your Durable Skills

In addition to the assessment criteria, all assessments across your apprenticeship will also be marked on your durable skills. Use this checklist to ensure you are submitting a high quality piece of work.

- **Clear communication**. I've clearly and concisely communicated my findings using professional language and effective presentation skills. My slides are well-designed with appropriate visual elements and any references are properly cited at the end of my slide deck.
- **Thinking strategies.** I've engaged in the critical analysis of available facts, evidence, observations, and arguments to form a judgment on what I think is important. Ultimately I've framed my analysis in a way that arrives at a solution.
- **Self-reflection.** I've considered feedback from previous work to inform the current submission. With this, I am engaging with feedback with a growth mindset in order to cultivate an attitude of continuous improvement.

How should I submit this Portfolio Project?

Your submission should include two components:

1. **Video Presentation Link**: Submit a link to your recorded 20-minute video presentation (maximum 21 minutes). The recording should be made using Zoom, Teams, or Google Meet. Before submission, test the link with a colleague or private email to ensure it's accessible to external viewers.
   Video Recording Tips:
    - Practice your presentation to ensure you stay within the 21-minute limit

© Multiverse

- Ensure good lighting, clear audio, and professional background
- Include your slides as screen share during the recording
- Test the final video link to ensure it's accessible to external viewers

2. **Slide Deck PDF:** Submit your presentation slides as a single PDF file. This is required for EPA documentation and plagiarism checking.

Ensure that you meet the MV guidelines for academic integrity by considering the following:

- **Referencing**: When discussing someone else's work, clearly acknowledge the source by using in-text citations and a reference list adhering to the Harvard referencing style. Include references at the end of your slide deck.
- **Presentation Length**: Any presentation exceeding the maximum 21-minute limit will not be assessed beyond that point. Assessors will stop watching after 21 minutes.
- **Visual Elements:** All diagrams, charts, and visual elements should be clearly labeled and referenced if taken from external sources.
- **Submission Time:** All submissions must be made by mid-day on the specified deadline.

How will my assessment be marked?

Carefully review the assessment criteria as you complete milestones and outputs of your project.

Description	F	E	D	C	B	A
Demonstrate a critical understanding of the relationship between data, technology and organizational strategy. (K7, S8) **LO1: Sections 1 & 3**	**Fails to recommend** a change that demonstrates an understanding of the relationship between technology and organizational strategy.	**Recognizes a basic connection** between technology and organizational strategy but offers a simplistic and **vague recommendation** that fails to align effectively with organizational goals.	**Identifies fundamental aspects** of the relationship between technology and organizational strategy but offers a **broad, generic recommendation** that demonstrates a superficial alignment with organizational goals and lacks insight into the strategic use of technology.	**Demonstrates a satisfactory understanding** by offering a **relevant recommendation** that aligns with organizational goals on a basic level. The proposal shows awareness of current technological trends but lacks a detailed strategy for integration and future-proofing.	**Exhibits a good understanding** by proposing a well-considered change that aligns more thoroughly with organizational goals. The **recommendation demonstrates** an ability to integrate current technologies while also considering the impact of emerging technologies, though it stops short of a fully developed future-proofing strategy.	Proposes a change to the current data strategy which demonstrates a **critical understanding** of the relationship between technology, data, and organizational strategy. The proposal provides **compelling alignment** with organizational goals while future-proofing by exploring emerging technologies.
Use the principles of leadership to critique a data strategy and proposed enhancements which improves decision making and/or creates business value. (K9, K10) **LO2: Sections 3 & 5**	**Unable to propose enhancements** that improve decision-making and/or create business value.	**Minimally identifies enhancements** with limited justification for how they might impact decision-making or create business value.	Shows **some understanding of leadership principles** by outlining **basic enhancements** with some analysis of potential impact on decision-making and business value, but lacks depth.	**Applies leadership principles** to develop a **practical enhancement plan,** analyzing its impact on decision-making and business value with some detail.	Critiques current strategy and proposes **well-justified enhancements using leadership principles,** showing clear understanding of impact on decision-making and business value.	**Exemplifies excellent leadership principles** to critique data strategy and proposes **strategic enhancements,** comprehensively analyzing and justifying improved decision-making and business value.

© Multiverse

Analyze organizational approaches to data/digital governance, including the development or acquisition of data solutions. (K7) **LO3: Section 2**	**Fails to analyze** organizational data governance. Omits roles, functions, or activities relevant to technology solutions.	**Identifies basic aspects** of data governance. Provides a superficial overview of relevant roles, functions, and activities.	**Describes** data governance with limited analysis. Mentions relevant roles, functions, and activities without depth.	**Develops insights** on data governance. Discusses relevant roles, functions, and activities with moderate analysis.	**Critically evaluates and applies** data governance strategies. Thoroughly examines relevant roles, functions, and activities with substantial analysis.	**Comprehensively analyzes and applies** data government strategies. Provides detailed review and strategic recommendations for relevant roles, functions, and activities.
Use sustainable development approaches, such diversity and inclusion, to critically analyze and improve data strategy. (K20, B8) **LO4: Section 4**	**Fails to apply** sustainable development approaches for analyzing or improving data strategy.	**Identifies basic** sustainable development approaches but struggles to apply them in analyzing data strategy for improvement.	**Describes** how sustainable development approaches might influence data strategy, outlining potential improvements with limited analysis.	**Analyzes** data strategy using sustainable development approaches, developing a plan with consideration of diversity and inclusion for potential improvements.	**Critically evaluates** and applies sustainable development approaches, including diversity and inclusion, proposing substantial improvements to data strategy.	**Comprehensively analyzes and synthesizes** sustainable development approaches for data strategy improvement, creating a detailed, impactful plan with clear strategies for implementation.
